

Overview

HP NC532m Dual Port Flex-10 10GbE Multifunction BL-c Adapter

The NC532m is a Flex -10 enabled 10 Gigabit Ethernet network adapter for the ProLiant c-Class BladeSystem. The adapter is a dual port 10GbE mezzanine, that when paired with the new 10Gb Virtual Connect Module provides up to eight physical function NICs that can be configured to operate at any speed from 100Mbps to 10Gbs. The NC532m will also support 10Gb connections when paired with the ProCurve 6120XG Blade Switch. The adapter ships with support for VLAN tagging, QoS, teaming (bonding), Receive Side Scaling (RSS) and PXE.

The NC532m adapter is supported in most ProLiant c-class server Type I and II mezzanine slots allowing customers to provision their servers with unprecedented bandwidth never before available in a blade.

HP NC532m Dual Port Flex-10 10GbE Multifunction BL-c Adapter

What's New

- Support for BL2x220c G6 server blade

Overview

At A Glance

- Supported per ProLiant c-Class server, in mezzanine slots 2 or 3 (full height servers) or slot 2 (half height servers). Supported in any available slot on BL495 and all Gen 6 servers
- Type I Adapter
- Supports HP's exclusive Flex-10 technology
- IEEE 802.1p QoS 802.3x flow control, and 802.3ap 10GBase-KR
- 4K Jumbo frames
- Dual 10Gb ports offer up to 40Gb/s bidirectional theoretical throughput
- Set any bandwidth from 100Mb to 10Gb on up to four "Physical Function " NICs per port

Models

HP NC532m Dual Port Flex-10 10GbE BL-c Adapter

467799-B21

NOTE: The NC532m network adapter card is required for each server blade connecting to a 10Gb interconnect in bays 3-8 (HP BladeSystem c7000 Enclosure) or bays 3-4 (HP BladeSystem c3000 Enclosure)

NOTE: The NC532m requires a minimum of 2 GB of server memory.

NOTE: The NC522m supports linking only at 1000Mbps or 10000Mbps when not connected to the HP Virtual Connect Flex-10 Ethernet Module.

Kit Contents

1. NC532m mezzanine adapter
2. Quick install card
3. Product warranty statement

Standard Features

Server Support

- HP ProLiant BL260c G5
- HP ProLiant BL2x220c G5
- HP ProLiant BL2x220c G6
- HP ProLiant BL460c
- HP ProLiant BL460c G5
- HP ProLiant BL465c
- HP ProLiant BL465 G5
- HP ProLiant BL465 G6
- HP ProLiant BL495c G5
- HP ProLiant BL495c G6
- HP ProLiant BL680c
- HP ProLiant BL685c
- HP ProLiant BL685 G5

Performance

Dual-port 10 Gigabit Ethernet Throughput

The 20,000 Mbps full duplex Ethernet transfer rate per port (40 Gbps aggregate full duplex) delivers outstanding network performance that improves response time and removes bottlenecks required for the next generation data center. Ten Gigabit Ethernet bandwidth is ideal for high performance computing, database clusters, iSCSI storage, storage backups, grid systems, virtualization, server and I/O consolidation, fabric consolidation, and more.

HP Virtual Connect Flex-10 10Gb Ethernet Module for the c-Class BladeSystem

Evolve 10Gb at your own speed! When paired with the HP Virtual Connect Flex-10 10Gb Ethernet Modules, take advantage of the Flex Nics, which are PCI Physical Function devices that are OS independent.

- Server ROM recognizes them as individual NICs
 - Speeds can be set per NIC from 100Mb to 10Gbps in 100Mb increments
 - Three fold increase in number of network connections per port.
 - Up to four physical function NICs per port
-

Jumbo Frames

The NC532m support for jumbo frames (also known as extended frames) permit up to a 4K byte transmission unit (MTU), which is over 2 times the size of standard 1500 byte Ethernet frame. The use of jumbo frames is a way to achieve higher throughput and better CPU utilization. Jumbo frames are particularly useful for database transfers and tape backups.

802.1p QoS Tagging

IEEE quality of service (QoS) 802.1p tagging allows the adapter to mark or tag frames with a priority level across a QoS-aware network for improved traffic flow.

TCP/IP Stateless Offloading

For overall improved system response, the NC532m supports standard TCP/IP stateless offloading techniques including:

- TCP/IP checksum offload (TCO) moves the TCP and IP checksum offloading from the CPU to the network adapter.
 - Large send offload (LSO), also known as TCP segmentation offload (TSO), allows TCP segmentation to be handled by the adapter rather than the CPU.
-

Performance

Interrupt Coalescence	Interrupt coalescing (interrupt moderation) groups multiple packets, thereby reducing the number of interrupts sent to the host. This process optimizes host efficiency, leaving the CPU available for other duties.
TOE	TCP/IP Offload Engine (TOE) moves the processing of data in the TCP protocol stack from the server CPU to the network card, freeing CPU cycles for other duties.
iSCSI Support	This device supports accelerated iSCSI. iSCSI boot currently not supported.
RDMA	Not supported
Network Adapter Teaming	ProLiant Network Adapter Teaming provides fault tolerance and load balancing across a team of two or more network adapters. The team of adapters works together as a single virtual adapter. Support for several different types of teaming is included. Teaming offers IT professionals an easy, efficient, and cost-effective way to provide network fault tolerance and increased network bandwidth.

Mezzanine Slot Compatibility

Server	Mezz Slot	c7000 Interconnect Bays		c3000 Interconnect Bays		Maximum NC532m 10GbE Ports/Server	Supported Interconnect Modules ²
		NC532m Port 1 ¹	NC532m Port 2 ¹	NC532m Port 1 ¹	NC532m Port 2 ¹

¹ Port numerations can vary by operating system.

NOTE: Some servers listed above may be discontinued.

NOTE: Except for the HP Virtual Connect Flex-10 Ethernet Module, the ProCurve 6120XG and the HP 10GbE Pass-Thru Module, all other supported interconnects are limited to 1Gb per port connection.

Service and Support, HP Care Pack, and Warranty Information

Warranty

HP branded hardware options qualified for BladeSystem c-Class and p-Class servers are covered by a global limited warranty and supported by HP Services and a worldwide network of HP Authorized Channel Partners. The HP branded hardware option diagnostic support and repair is available for one year from date of purchase, or the length of the server they are attached to, whichever is greater. Support for software and initial setup is available for 90 days from date of purchase. Additional support may be covered under the warranty or available for an additional fee. Enhancements to warranty services are available through HP Care Pack services or customized service agreements.

Additional information regarding worldwide limited warranty and technical support is available at: <http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>

Support Services

The HP Care Pack service for ProLiant BL c-Class and p-Class server blades cover the server blade and all HP branded hardware options qualified for the server, purchased at the same time or afterwards, internal to the server. HP Care Pack Services provide total care and support expertise with committed response designed to meet your IT and business needs.

To fully capitalize on the capabilities of your HP BladeSystem servers, a service partner are required who thoroughly understands your server technology and systems environment. HP Services, an industry leader in the provisioning of multi vender support solutions, provides a range of support services designed to meet the varying needs of today's businesses. Whether an SMB or large global corporation, HP has a BladeSystem server support offer to help you rapidly deploy and maximize system uptime.

Recommended Service - Simplify BladeSystem solution implementation, maintenance, and management.

- Support - 3 year 4 hour response 24x7 same business day coverage.
- Deployment Service - Installation and start up for HP BladeSystem Infrastructure.

Enhanced Service - Optimum service level to increase IT performance and availability.

- Support - 1 year HP Proactive BladeSystem Service.
- Deployment Service - Enhanced Network Installation and start up for HP BladeSystem Switches.

Installation & Start-Up service for HP BladeSystem Infrastructure plus HP BladeSystem Enhanced Network Installation and Start-UP as per the Customer Description and/or Data Sheet. To be delivered on a scheduled basis 8am-5pm, M-F, excluding HP holidays.

Technical Specifications

General Specifications	Network processor	Broadcom 57711		
	Data rate	Two ports, each at 20 Gbps full duplex; 40 Gbps aggregate full duplex theoretical bandwidth. Note that each port on the NC532m adapter transmits from the server at only 20 Gbps (theoretical) full duplex.		
	Bus type	PCI Express v2.0 (Gen 2) x8		
	Form factor	The NC532m is a Type I card, however it is not supported in Mezzanine slot one of Gen 1 and Gen 5 servers with the exception of the BL495. It is compatible in any slot on all Gen 6 servers.		
	IEEE Compliance	802.1p, 802.1q, 802.3u, 802.3ad, 802.3ae, 802.3ap (10GBase-KX4), 802.3x and 802.3z		
Power and Environmental Specifications	Operating	Temperature	0°C to 55°C / 32°F to 131°F	
		Humidity	10% to 90% non-condensing	
	Power requirement	15W		
	Emissions classification	FCC Class A		
	Agency approvals	USA	FCC (CFR 47 part 15) and UL 60950	
		Canada	ICES-003 and CSA60950	
		Japan	VCCI	
	Korea	MIC (RRL), EMC Registration

Environment-friendly Products and Approach

End-of-life Management and Recycling

Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
